

March 2005

Year VII, Nr. 1/05

RoHS Directive

Ref.: RoHS (Restriction of Hazardous Substances) 2002/95/CE of 27/01/2003.

Dear Customers,

by the present letter, and with reference to the above Directive, we inform You that the only hazardous substances contained in our products are:

- Lead (Pb), used for pin connector systems;
- Hexavalent chromium (Cr6+) used for passivation coatings.

ITW ELETTRIGIBI is already taking some remedial measures, in order to remove these substances. This means that, starting from **July 2005**, our production will be in compliance with the RoHS directive.

Our technical/commercial staff is at Your full disposal for any further information You might need about this matter.

Kind regards

ITWELETTRO GIBI
