Cusago, April 12th, 2002

Year IV, N° 2/02

Dear Sirs,

we take pleasure in sending you our "Newsletter" number 2.

The aim of this newsletter is to inform you about the new communication tools developed by EGB in order to assure a more effective and complete level of information for your market.

1. New website

Click on our new www.itwelettrogibi.com address to visit our new site, full of commercial and technical facts and figures.

The valued functions that have now become indispensable for complete customer information are, of course, found in this page. In fact, we've digitised our catalogue, now available on line: you can now download from the Web technical sheets certain that these are always up-to-date, with the drawings, certification, packaging and all the other information previously only on paper. We've also activated the download of our Electronic and Electromechanical catalogues.

You can already access and browse our company profile, the pages on the ITW Group worldwide, our sales network and the new News section, thanks to which you can be kept constantly updated on our activities and communications.

We expect to complete the other functions as soon as possible in order to offer you a fast, useful information service.

2. New "Short Forms"

The new revised and updated versions of the Short Form are now available for our customers - for both the Electronics and Electromechanical lines. In addition to the new cover that's more coherent with the new corporate image, these leaflets have also been redrafted inside, with clearer graphics and updated information on the products (technical sheets and certification).

In an effort to provide you with ever better and more useful services and tools, we gladly accept any suggestions or comments you may wish to make.

Best regards,

Dr. Alberto Biundo
Marketing & Communication
ITW Elettro GIBI
